

Cellulite is nothing more than normal fat beneath the skin. The fat appears bumpy as a result of the skin's inability to hold back the pockets of fat cells which push up against the connective tissue below epidermis. This results in a dimpled and pocketed texture on the thighs, hips and buttocks, arms and the abdomen.

Women have a 10:1 ratio of alpha receptors to beta receptors, and since alpha receptors trigger fat storage, a higher ratio of these receptors can lead to more body fat and cellulite. **SAIAN Bio-Contour Slimming Cellulite Gel** lessens the appearance of cellulite areas by reducing the volume of fat cells. It is absolutely natural, easy to use and safe.

CELLULITE

The main ingredients used in this product are **Adiposlim** and **Adipoless**. Both ingredients target the adipocytes, amongst the biggest cells in the body used to store fat. Adiposlim can help to reduce the effects of alpha receptors by blocking them, and activating beta receptors to burn fat. A clinical trial using Adiposlim on the thigh area showed a visual improvement in the appearance of cellulite in 71% of treated subjects.

**Adipoless** is quinoa extract - the role of quinoa is to stop cell maturation and force the adipocytes to become dormant. Adipoless is primarily used as a preventive to stop the body from forming the blood vessels that make fat, and can halt the formation of new cellulite.

- **Reduces the appearance of cellulite dimples**
- **Tones and firms for a smooth and toned look**
- **Moisturizes and hydrates the skin**
- **Prevents the formation of cellulite**
- **Perfect conductor gel for Cavitation/RF**
- **Includes Vegan Hyaluronic Acid**
- **Fortified with bioflavonoids**
- **No added fragrance**
- **Results within the first 2 weeks of use**

**SAIAN Bio Contour Slimming Cellulite Gel** is water-based and fragrance free, and is perfect to use with radio frequency equipment, cavitation machine, micro current, galvanic, and ultrasonic. It is also ideal for body wraps, thigh and abdomen wraps and arm wraps. This gel's revitalizing properties make it an obvious choice when it comes to natural slimming therapy.
