

# MANN™

A man's skin is by nature extremely different from a woman's. Most notably, it is up to 25% thicker, meaning that products formulated for men need to be stronger, with extremely active ingredients that yield powerful results.

NATURAL, CLINICAL STRENGTH MEN'S PRODUCTS

## Cleanse

Thanks to its ingenious use of 10% Glycolic Acid, **MANN Active Face Wash** helps to reach deep into the skin, removing excess oil which often clogs pores. It also exfoliates dead skin cells, which helps stimulate the growth of new skin cells. Rich in natural moisturizing, skin soothing and antioxidant ingredients, this helpful and refreshing wash effectively tackles the difficult task of managing problematic skin. It successfully helps vanquish blemishes and blackheads. Thoroughly removes dirt and debris, leaving skin squakly clean.

## Hydrate

Using the latest advancement in biochemistry, **MANN Neuropeptide Growth Factor Serum** delivers 5 unique peptides, molecularly identical to the growth factors found in the human placenta. These exclusive peptides are in a league of their own, with remarkable ability to promote, support, and prompt the skin to function as it did in its youth. These improvements are visually noticeable as regeneration is increased, strength is regained, hyaluronan synthesis is promoted, and collagen production is encouraged.

- \* Biomimetic peptides
- \* Neuropeptides
- \* Nutrient-rich trace elements
- \* Vegan Placenta
- \* Activates, regenerates, and restructures
- \* Minimizes the appearance of expression lines and wrinkles
- \* Helps to maintain and prolong the effects of Botox injections
- \* Firms, fortifies, and redensifies

## Protect

An important consideration when selecting a quality sunscreen is its ability to stay on the skin and maintain effectiveness while under exposure to elements like water. This becomes ever more pertinent for athletic activities, or anything involving intensified contact with the environment. **MANN Active Sunscreen SPF 30 (Water Resistant)** was designed with longevity and the utmost effectiveness in mind. Perfectly suited for men who intend to spend long active amounts of time under the sun, this water resistant sunscreen uses the synergistic UV screening properties of Titanium Dioxide and Octinoxate to help prevent sunburn. Water Resistant silicone oils help maintain a solid hydrophobic barrier for 40 minutes duration, while Aloe and a blend of nourishing oils help moisturize and invigorate the skin.

- \* Provides exceptional UV protection
- \* Moisturizes and soothes skin
- \* Is water resistant
