

With **SKIN Pro II** you can restore skin's vitality and flexibility, reduce fine lines, tone and improve skin texture. Portable, lightweight, and easy to operate - this beauty product is a revolutionary new system for Spa, Salon, and Home use.

**SKIN Pro II** comprises 3 beneficial skin care programs using 2 types of electric currents:

- 1. GALVANIC CURRENT:** A continuous current which increases the absorption of skin care products and improves skin appearance.
- 2. MICRO-CURRENT:** Variable alternate current that minimizes the appearance of wrinkles.

### Four stages: Cleansing - Massaging - Nutrition - Lifting

**Step 1** cleanses the pores deeply, removing excess sebum deposits, dirt, debris, and impurities. Stimulates circulation.

**Step 2** makes the skin more elastic and firm and prepares the skin for Step 3. This setting is excellent for increasing circulation.

**Step 3** introduces water-soluble treatment products into the skin, increasing skin elasticity and giving it tone. In order for this function to work properly, the serum applied to the face must be water soluble. Heavy creams or serums that do not dissolve in water, and leave an oily film on the skin will not ionize due to the product's large molecular structure. This setting is perfect to use over collagen masks.

**Step 4** tightens, lifts, tones and firms skin using microcurrent technology, while increasing circulation and relieving muscle tension which causes deep wrinkles and lines. It is relaxing, safe, gentle and painless. This setting is perfect to use over SAIAN Collagen Masks.

- Titanium Dioxide coated Probe minimizes the spread of germs and bacteria.
- Auto Stop function: with four minutes for each stage.
- Electrode Hand Grips work as conductor, mandatory for appliance to work.
- Intensity adjusts to meet your needs. (LOW-for face, HIGH-for body)
- Three buttons with LED indicators to show different working status.
- DC-9V, with international-approved adaptor included.
- Superior quality material, elegant and durable. Small and smart, easy to use.
