

## Pure Vitamin C Serum

Revolutionary **SAIAN Pure Vitamin C Serum** is based on Hyaluronic Acid, and formulated with 3 of the most potent forms of Vitamin C available on the market today; Ascorbyl Glucoside, Sodium Ascorbyl Phosphate, and Magnesium Ascorbyl Phosphate. This powerful antioxidant serum fight free radicals, stimulates collagen production, nourishes the skin, reduces the appearance of fine lines and wrinkles, and brightens the skin tone.

AA2G (Ascorbic Acid 2-Glucoside) was originally developed in Japan to lighten the overall tone of the skin and reduce the pigmentation in age spots and freckles. Further research has shown other dramatic benefits, and today AA2G is used for reversing the effects of aging, and in sunscreen products for protection. AA2G slowly releases vitamin C, which acts as a free radical scavenger, thereby reducing the amount of skin inflammation and roughness.

Magnesium Ascorbyl Phosphate, Sodium Ascorbyl Phosphate (NaASMP) and AA2G in our serum are extremely stable against high temperatures, pH, metal ions and other mechanisms of degradation, resulting in a long shelf life without parabens!
