- Big bowl
- Gloves
- Cryo-Globes
- Machine: Steamer, High Frequency machine, Mini Cavi Pro

Become a superstar at treating acne by following this easy step-by-step treatment protocol:

1. Before starting the treatment, prepare a pair of gloves, and 2 bowls of water - one warm, and one cool. Cleanse the face with **SAIAN Active Cleanser**. This foamy cleansing gel contains 10% Alpha Hydroxy Acid to kill germs and bacteria, seaweed extracts to nourish and strengthen capillary walls, and rosehip seed extract. Remove the cleanser with warm water thoroughly.
2. Saturate glycolic applicator swabs with **SAIAN Salicylic Acid 2%**, and gently buff the face upward from both sides until the client feels a light tingling. For your first time client, keep the Salicylic acid on the face for a maximum of 2 minutes. You may later increase the time as your client's tolerance increases. Remove SAIAN Salicylic acid with cool water after 1-2 minutes.
3. Mix a ½ teaspoon of **SAIAN Enzyme Mask** with warm water to make a soft paste. Apply SAIAN Enzyme Mask to the whole face for 10 minutes. Turn on the steam and the ozone, and point to the client's face, so the mask stays moist, and the enzymes are active. If you don't have a steamer, use a moist hot towel over the Enzyme mask to keep it from drying up. This mask is based on bentonite clay, oats, and pineapple enzymes, which exfoliate and cleanse out the pores. SAIAN Enzyme Mask is perfect before extractions. Remove SAIAN Enzyme Mask with warm water.
4. Perform Manual **extraction**. Change tissues often to prevent the spread of bacteria
5. Use your **SAIAN portable high-frequency machine** over the blemished areas for 3-5 minutes. Before use don't forget to ask your client if she is pregnant or has a pacemaker. Our portable machine has 4 attachments and is great for a mobile spa business.

6. Apply a thin layer of **SAIAN Active Rx Mask** to overly oily and blemished areas for 15 minutes. SAIAN Active Rx Mask is based on bentonite clay, sulfur, camphor, magnesium, hyaluronic acid, salicylic acid, and oxygen plasma. Wash off the Active Rx Mask with warm water.
7. Spray with **SAIAN Herbal toner**. It doesn't contain any alcohol or oil, and is a beautiful bouquet of herb extracts based on witch hazel and aloe.
8. Apply **SAIAN Pure Hyaluronic Acid Serum** over face
9. Perform Phototherapy with Mini Cavi Pro Machine (BLUE photon Light) NO Ultrasonic on face
10. Apply **SAIAN Acne Spot Treatment Gel** on blemishes. It contains minerals such as magnesium and iron which kill germs and bacteria without leaving discoloration.
11. Take out your **SAIAN Jelly Globes** from the freezer and wipe them dry to remove excess moisture. Use the Cryo-Globes to massage the face upward to close the pores and minimize redness.
12. The final step is to spray the client's face with **SAIAN Mineral Mist**. This water-based sunscreen is perfect for all skin types, and contains no oil, no alcohol and no chemicals.
